

Aurea Collaborative Enterprise to optimize retail ERP

Aurea Collaborative Enterprise streamlines retail product and supply chain management with the best in ERP. ACE lets you share information in real-time between departments, accelerate processes, and improve global visibility.

Deliver the right product to the right shelf at the right time

End-to-end supply chain management is essential to running an efficient and engaging retail business. Aurea Collaborative Enterprise (ACE) delivers best-in-class retail ERP and supply chain solutions to give comprehensive insight to suppliers, distributors, and customers. It provides tools to intelligently manage product stock, fulfillment, sales, and finance.

Aurea Collaborative Enterprise delivers an end-to-end suite of integrated solutions designed to address specific retail supply chain, ERP, financial, and merchandise management needs.

KEY BENEFITS:

Integrated accounting & finance: Aurea Collaborative Enterprise's finance solution streamlines all aspects of financial management and reporting. ACE's eFinance module includes audit tracking, accounts payable and receivable, general ledger, and revenue reporting with integrated financial management capabilities.

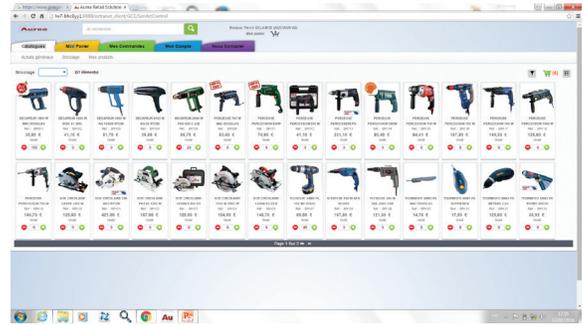

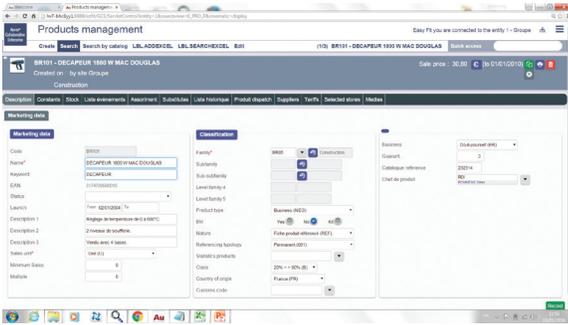

Supply chain management: ACE provides insight to shorten lead times, reduce inventory risk, manage purchase orders and improve margins across your retail supply chain.

Product information and merchandising management: The ACE Product Information (PIM) and merchandise management solution enables consistent, accurate, and comprehensive product and pricing data for every product. PIM centralizes and streamlines product master data management, and provisions that data across sales channels.

ACE FEATURES:

- Supply chain management and optimization
- Integrated merchandising and product information management system
- Financial management
- Streamlined purchasing portal
- Multi-channel sales management

Sales management: ACE Sales Management provides comprehensive invoicing and billing capabilities to guarantee service levels, increase turnover, and reduce financial risk. Capabilities include: price & promotion management, CRM, call center support, order entry and management, shipment, invoicing and more.
