Set yourself apart from the competition with Aurea Energy Solutions

Success as a retailer requires more than a motivated sales team. To grow your brand and retain customers, you must excel at across the revenue lifecycle – through billing and customer service – while being able to enter new markets quickly.

Revenue Lifecycle Management from AES platform gives energy retailers the tools they need to grow and compete – from our fully managed, multi-commodity, CIS system, to our EDI and on-demand information exchange services, to our feature-rich API catalog, and our industry-experienced client service and operations teams. At Aurea Energy Solutions, we are dedicated to your business, know your goals, and are committed to helping you reach them. We allow you to focus on what you do best – selling energy to new customers.

Aurea Energy Solutions provides hosted EDI and on-demand information exchange in the form of a fully outsourced business process to over 25 customers in the energy industry. We currently work with 120 utilities and more than 40 natural gas pipelines, managing in excess of 3M customer accounts monthly, over 1M transactions daily, and over 350M transactions annually with an average transaction throughput of under three minutes. Across all of our customers, we manage more than \$20 billion in financial transactions every year.
