

Email Security from Aurea Messaging Solutions for complete email protection

Email Security from Aurea Messaging Solutions (AMS) keeps your email free from security threats. You can eliminate the risk of inbound and outbound spam, viruses, and malware. With the most effective security available, AMS Email Security — formerly MessageOne — includes 100% protection from email viruses, 99% spam capture, and 100% availability.

Delivered in the cloud, AMS Email Security is cost-effective, easy to deploy and maintain, and scales to meet the needs of every organization.

- Formerly MessageOne, the industry leader in end-to-end email continuity, archival, security, and emergency communications
- Comprehensive protection against viruses, spam and malware
- Cloud-based for rapid, low-cost deployment

Comprehensive cloud-based email protection

AMS Email Security protects your organization from inbound and outbound email threats that can harm your infrastructure and your business. And, since it's cloud-based, you won't incur any upfront hardware or software costs. It can be deployed in days, and requires virtually no IT maintenance.

Our industry leading architecture combines multiple scanning engines, multi-layered content filtering, and full reporting capabilities that keep you in control of enterprise email every day.

KEY BENEFITS INCLUDE:

Inbound and outbound antivirus protection: Antivirus engines offering double scanning of all incoming and outgoing email. And, the antivirus engines automatically update to minimize management while maximizing protection.

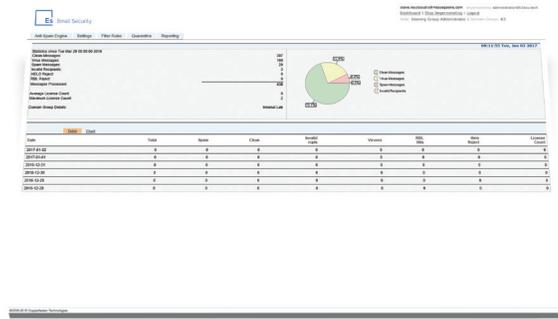

Multi-layered spam analysis: A comprehensive layered approach ensures the highest continuous levels of spam detection accuracy. These include Sender Policy Framework (SPF) and recipient verification, SURBL and RBL validation, and keyword, header and body text analyses. AMS Email Security also integrates customized scoring algorithms which deliver an overall per-email score to determine if each message is safe.

End-user spam management: With AMS Email Security, you can delegate daily spam management. End users have full visibility to all blocked email, and can release required email without having to resort to the company helpdesk.

Comprehensive reporting suite: You'll have real-time access to graphical reports to keep email secure and under control. Reports include top spam recipients, senders, along with full search capabilities to get a deeper understanding of issues affecting your enterprise email.

Confident, complete email security

When business is on the line, you can't afford to compromise on email protection. With AMS Email Security, you don't have to. More than 1000 organizations and millions of users depend on Aurea Messaging Solutions to deliver the most advanced, cloud-based email security solutions available.
