

Test, Assess, and Optimize AlertFind's Reach

With natural disasters, active shooter situations, product recalls and other unplanned enterprise-rattling calamities on the rise, the reliability of AlertFind has never been more critical. While emergency mass notification systems (EMNS) like AlertFind are largely in place in most companies, plans to routinely test and optimize their use are not. This represents a tremendous, avoidable liability.

Recent events have shown that it's not enough to just have on-boarded an EMNS. From a liability and risk management perspective, companies risk reputational damage and the costly defense of unfounded legal claims in the wake of a calamity. It's essential to do everything possible ensure you're using AlertFind to its full capacity. In the aftermath of an actual disaster, you'll want to be able to demonstrate that every possible precaution was taken on a regular basis and you'll want to have that maintenance documented.

A solution that enables you to routinely test AlertFind protocols, assess opportunities to improve its use, and proactively make any needed modifications to your emergency protocols is not just nice to have; it's a matter of sound risk management, and may well also be a matter of life and death.

Introducing the AlertFind Disaster Simulation Propack—included in Platinum Support

That's why we've created the AlertFind Disaster Simulation Propack, exclusively included in Aurea Platinum Support. This Propack delivers the services you need to ensure your company's ongoing preparedness to do all the right things when a disaster occurs.

NOW, YOU'LL HAVE AN EXPERT TEAM TO HELP YOU:

Test: Pre-plan, simulate and document a realistic enterprise-wide emergency to see where you would stand if a disaster were to strike today.

Assess: Analyze the results of your simulation, and report on the state of your disaster and enterprise continuity communications capabilities.

Address: Act on evidence-based, concrete recommendations to help HR and risk management teams improve your use of AlertFind and bring it in line with best practices.

Ensure AlertFind's Broadest Impact

The AlertFind Disaster Simulation Propack lets you simulate one (1) disaster scenario per year. Now, the AlertFind Disaster Simulation Propack is available exclusively through Aurea Platinum Support, adding even more value and benefit.

Aurea Propacks for speed, simplicity, and quality

Accountability

Aurea is accountable for delivering results. Our cross-functional team of subject matter experts and engineers guarantee project success.

Flexibility

Choose the capabilities you need when you need them. It's easy to accommodate changes in strategy and priorities.

Simplicity

Propacks benefit from accelerated project initiation, and simplified administration and reporting during delivery.

Expertise

A dedicated Delivery Manager orchestrates delivery, engages the right SMEs, and ensures business continuity.
